

Frequency Assignment & Usage

1. There are pre designated frequencies for the day to day dispatching of calls for fire, EMS, and police (North, Central, South, & Metro).
2. The usage of operations channels is at the discretion of the Telecommunicator or supervisor. The supervisor will be advised of all requests from field personnel who wish to utilize an operations channel.
3. All individuals using the frequencies designated by the 9-1-1 Center shall also abide by the FCC rules.
4. Every Dispatch frequency will have the Call Signs announced at the beginning of each hour, with the exception of the frequencies that have automatic identifiers transmitted (metro).
